MULTICHANNEL PIPETTES

Easy and light tip mounting & ejection

Excessive workload of the thumb is a major cause of repetitive strain injuries and user discomfort in multichannel pipetting.

The unique design of the **CappAero™** Multichannel pipettes considerably reduces the thumb workload. Ejection is simply a matter of applying light pressure to the levered ejector arm.

Thanks to the double o-rings on the aluminum and metal nose cones, the **CappAero™** Multi eliminates the need to 'hammer' your pipette into the tips rack to secure the optimal tip mounting. You now need only to apply a slight even pressure to perfectly secure tips to the nose cones. In addition to it, **CappAero™** Multichannel Pipettes are one of the lightest pipettes on the market and produce a consistent and reliable liquid transfer result in one ergonomic solution.

Single Channel Accuracy and Precision in a Multichannel Package

The **CappAero™** Multi guarantees single channel accuracy and precision across all channels due to the special design and construction of the Capp piston assembly. The incredibly robust and fully autoclavable pipette body offers easy maintenance while the unique Capp design with individually replaceable tip bases reduces the cost of what were once inevitable repairs.

The **CappAero™** Multi's use of anodized aluminum and metal nose cones instead of plastic ones substantially reduces breakage due to accidental dropping and tips mounting. The majority of internal construction parts are made of light weight metal components and along with stainless steel pistons ensure a highly robust performance for ultimate stability overtime in terms of accuracy and precision. This smart and highly ergonomic pipette is built to last.

CappOrigami

Use your reagent most efficiently with **CappOrigami™** Reagent Reservoirs.

The **CappOrigami™** represents a new way of thinking when it comes to reagent reservoirs. The stiff architecture procure a consistently sharp V-shape reservoir. This makes the pipetting easier and assures an efficient use of the reagent. They are packed, shipped and stored as flat sheets.

To use the reservoir, simply flick it up by pushing the sides together. This environmentally and storage friendly product will save bench space and money.
