

CryoCarrier Series

Dry Shipper for Transportation

CryoCarrier Series is dry shipper dewars for safe transportation of biological products in vapor phase at cryogenic (-150°C or lower) temperatures.

Taking advantage of innovative absorbing material and optimized construction, Antech CryoCarrier Series dry shippers can be recharged within 2 hours, while new/warm tanks still need a sit time of 24 hours.

Features

- Vapor phase storage ensures dry and spill-free shipping
- Light in weight and durable to use
- Applicable for various of sample containers, such as vial, straw, blood bag
- Recharged in 2 hours
- Holdover time 2~15 days to meet different requirements
- Protective trolley case as optional

Based on type of products to be transported, Antech offers 3 lines of dry-shippers:

- CryoCarrier R: for biological products stored with cryogenic vials and boxes;
- CryoCarrier B: for biological products stored with 25ml/50ml/250ml blood bags and cassettes;
- CryoCarrier C: for biological products stored with round canister, such as straws, cryogenic vials.

CryoCarrier B

CryoCarrier C

Protective Trolley Case

- Heavy duty case with aluminum frame, durable to use
- Forming material protection for safety
- Trolley for easy movement
- Case lock preventing unauthorized access

Smart Data Logger

- 200~70°C
- Multi-Use, replaceable battery
- USB 2.0 plug, 28800 readings
- Encrypted PDF report embedded with raw data Bluetooth printer connection (200XB)
