ARCTIK® ULUF 65

true cooling specialists

ULTRA LOW TEMPERATURE UNDERCOUNTER! THE ULUF 65 WILL ADD A NEW DIMENSION TO YOUR LABORATORY, USE IT EITHER AS A BENCHTOP OR UNDERCOUNTER. The compact space-saving design and low noise level makes it a perfect storage solution for your laboratory.

COOLING TECHNOLOGY

The small size is achieved by utilizing Arctico's special single compressor technology.

The single compressor technology is specially designed to reduce the number of mechanical components that generates unnecessary heat and noise.

It comes with the same advantages as regular sized -86°C from Arctiko and is best in class in cooling performance.

► FILTERLESS CONSTRUCTION

Our filter less construction makes cleaning unnecessary. The evaporator coils are spaced so far apart that dust will not be trapped and obstruct the airflow.

With our unique construction, the dust intake is minimal, which eliminates the need for filters entirely, saving you maintenance time and cost.

CUSTOMIZED SOLUTIONS

Even in this size Arctiko can provide a wide range of accessories for customization of the unit, though it is not required to function.

With an optional CO_2 back-up system will keep your samples cold as long as there is CO_2 available in the system – eliminating the dangers of an unstable power grid or simply bad weather.

The user friendly G214 controller is standard for the ULUF 65. It includes different alrams as visual, acoustic, open door and more.

Insulated inner door for better recovery time after door openings and optimal temperature stability.

Key lock is a standard feature in our ULUF 65. Placed on side of door for optimal security for your samples.
